# Case Study

We first used the services of Talented Teacher Jobs some three years ago with a successful recruitment campaign for a Head of Sport. Since then we have used their technology to successfully recruit as part of our strategy to reach the candidates that job boards are unable to.

Each time we have run a campaign, we have received a good number of high quality applications both for teaching roles and teaching support roles. Recruitment campaigns have always been launched quickly and efficiently, and with the costs being both within our budget expectations and offering very good value.

We take advantage of the opportunity to purchase packs of campaigns, again offering very good value and with a generous time horizon in which to use the campaigns.

The Service provided by our Account Manager has been excellent, efficient and flexible, and we now regard Talented Teacher Jobs as our trusted partner for all recruitment requirements.
